Streaming Music - "https://henrymusic.tech/"
02/2023
Henry Bootcamp, Buenos Aires, Argentina.

- We use two Apis (google and Spotify), one to get the music and the other to get the data of the albums, artist, year, name of the song.
- The database was made in postgres and the backend with express, multer, axios, sequelize and JWT. The relationships allow to create a playlist per user and other middlewares.
- In the Front-end we use html, react, redux and bootstrap.
